Subject: CWEA/CSAWWA Water Reuse Webinar - Info on UIC

Jill,

I was approached by the Chesapeake Water Environment Association/Chesapeake American Waterworks Association reuse committee about a webinar regarding the regulatory aspects of the SWIFT project. Since the regulatory framework for SWIFT falls under UIC permitting, I thought it would be ideal if you or Mark (or perhaps someone else from your program) could provide information on the UIC program in region 3. I could talk a little about SWIFT and how we prepared for UIC authorization for the SWIFTRC and our next steps to get ready for the full-scale permitting process. It's a short webinar. It's only a 25 minute presentation that we can divide up based on the amount of information we have to provide. I think this group is quite curious about the UIC program. They have this scheduled for May 17 from 12 – 1. Do you think that this is something that you would be willing to participate in?

Jamie
